Specification

1. The disclosure is objected to because of the following informalities: On page 6, lines 2-17, the disclosure refers to Fig. 1, however, the present application does not have any drawings. In addition, the information on said page is unnecessary in the absence of the figure.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later

invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claim 1 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Brichard et al. (US Patent No. 4,321,301), hereinafter "Brichard".

Brichard teaches a process for stabilizing particles of peroxygenated compounds by coating with a coating agent which contains at least one boron compound from metaboric acid, orthoboric acid and tetraboric acid, wherein the coating agent is used in quantity corresponding to 0.5 to 20% by weight of the peroxygenated compound (see abstract, Examples 3 to 6 under cols. 5-8). In Table III Brichard also teaches the particle size of the uncoated sodium percarbonate. Hence, with these parameters, it would be inherent for the particles of Brichard to satisfy the recited formula.

6. The prior art made of record and not relied upon is pertinent to applicants' disclosure. These references are considered cumulative to or less pertinent than those discussed above.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lorna M. Douyon whose telephone number is (703) 305 3773. The examiner can normally be reached on Mondays-Fridays from 8:00AM to 4:30 PM.
